Fullstack Web Developer with 3 years of experience in designing and developing functional websites using interfaces, testing, debugging, and making engaging user experiences. The quality of my work has been recognized with a digital storytelling award.

DEVELOPMENT EXPERIENCE

Center for Innovative Pedagogy

Web Developer

Gambier, OH

January 2017 – Present

Technology: Javascript, JQuery, SQL, CartoDB API, Leaflet, HTML, CSS

- Designed and developed a series of interactive digital maps showing ancient travel patterns.
- Mapped geocoded data of 19 historical events using the CartoDB API, allowing users to easily navigate the map to learn important stories from ancient Roman history.
- Won the competitive 2018 Kenyon Digital Storytelling Award in recognition of the work.
- Presented the project at Kenyon's Celebration of High-Impact Practices.

Expert Learning Systems

Junior Developer

Gambier, OH

June 2016 – September 2016

Technology: PHP, Javascript, JQuery, MySQL, XML, HTML, CSS

- Assisted in developing a website to track in real time the efficiency of solar panels in Belize.
- Represented solar panel data from six different schools in Belize using graphics designed with Javascript.
- Improved user interface in order to create a more engaging and accessible user experience.

EDUCATION

Kenyon College

Bachelor of Arts in English, expected May 2019

Concentration in Scientific Computing

GPA: 3.71

SKILLS

- Primary languages: Javascript with React Framework, NodeJs, Python
